# SecurePIM

SecurePIM

Make mobile work secure for government authorities

Work efficiently and communicate easily with smartphones and tablets

Government authorities, public companies and service providers for defense industry must meet high security requirements. The strict secrecy and GDPR guidelines require it. Working and communicating on mobile devices could therefore not be secured sufficiently or only at great expense. Until now.

Secure mobile working in federal, state & local governments

Enable the secure foundation for mobile communication with SecurePIM. The German Federal Office for Information Security (BSI) has reviewed the security architecture and even granted Approval (iOS) or Pre-Approval (Android) for the VS-NfD system solution SecurePIM Government SDS. With the SecurePIM app, your employees can retrieve and send encrypted emails from anywhere, maintain calendars, edit documents, as well as use the Internet and intranet.
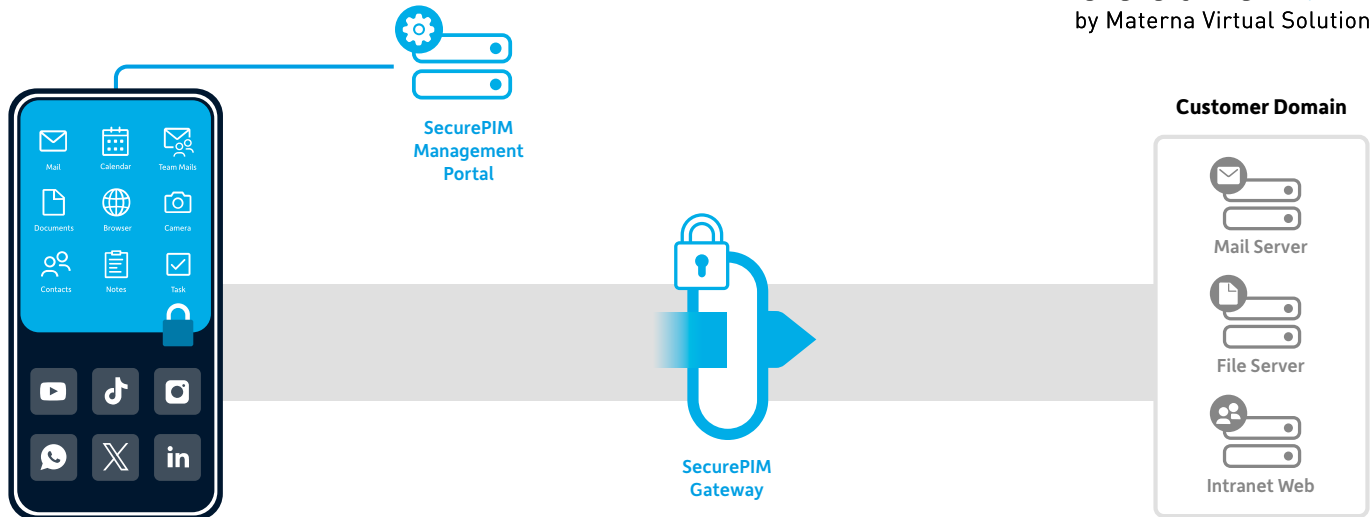

SecurePIM App Modules

+ Mail
+ Team Mails
+ Contacts
+ Calendar
+ Notes (Exchange only)
+ Tasks (Exchange only)

Focus on high usability

Employees are allowed to use what is safe. To ensure that they are happy to do so, SecurePIM offers high usability: all relevant office functions intuitive to use – known already by your employees from native apps.

Free choice of devices and platform-independent

Reduce your operating expenses and offer more choice of devices. SecurePIM works platform-independent for iOS and Android with almost all mobile devices. The solution supports Microsoft® Exchange and HCL Domino via ActiveSync.
 File access is via WebDAV and synchronization with Active Directory or LDAP.

Only one smartphone for business and private

With SecurePIM, you implement COPE and BYOD models quickly and easily. The container technology ensures strict separation between business and private data on one device – no more second smartphone needed.

Please ask us for advise how to integrate SecurePIM into your IT infrastructure. Do you have to comply with legal requirements for working with classified information (VS-NfD or NATO RESTRICTED)? The SecurePIM Government SDS system solution is approved (Approval for iOS; Pre-Approval for Android) by the German Federal Office for Information Security (BSI). Please contact us for more information.

The Benefits of SecurePIM

Convenient for your users
+ Secure mobile working with smartphone and tablet
+ Intuitive use without training
+ Everything in one productivity app
+ Use of personal devices possible thanks to strict data separation (BYOD)

Less effort for your IT
+ Easy configuration and rollout in existing infrastructure
+ Management via SecurePIM Management Portal or via existing MDM system
+ Available as on-premises or cloud solution
+ Can be implemented quickly and with low hardware costs: BYOD models
+ Motivated employees through simple intro-duction of COPE models

Peace-of-mind for your compliance officers
+ Encryption of all internal information for data at rest and also for data in transit
+ Strict separation of internal and personal data on the device
+ GDPR compliant with full control over internal information

>500 Authority & Corporate customers

>120 Authorities & Defense

>45 Federal Authorities

>330.000 Users on iOS and Android

>92% extend & renew their licenses
